

OPI PRODUCTS INC.

STATEMENT ON ENVIRONMENT AND SUSTAINABILITY

OPI Products Inc. (“OPI”) is committed to providing products of superior quality and value that are intended to improve the lives of consumers everywhere. As part of this endeavor, OPI continually strives to improve the environmental quality of our products, packaging, and operations.

OPI supports the concept that sustainable development is a very simple idea about ensuring a better quality of life for everyone now and in the generations to come. To support this idea, OPI endorses the following basic principles:

Business conducted with integrity and a core value to do the right thing

A global free market governed by rules

A climate of innovation

Decisions based on sound choice

Freedom of consumer choice

POLICY ON ENVIRONMENT AND SUSTAINABILITY

1. OPI is committed to improving lives with high quality products while safeguarding the health of our customers. We also recognize we have a responsibility to protect the well-being of animals. Therefore, OPI is committed to seeking out and using raw ingredients in our products that have not been tested on animals. Further, we avoid supporting raw material suppliers that use animal testing as part of their overall scheme of safety testing.
2. OPI is committed to a policy of no animal testing on any of our products.
3. OPI is committed to ensuring our packaging has minimal impact on the environment. We work with our suppliers to design packaging according to the following principles:

To reduce the amount of raw materials

To facilitate recycling by

OPI PRODUCTS INC.

- Reducing the variety of raw materials involved
- Labeling product with details of its components and their recyclability
- Continually involve our packaging suppliers in our efforts to produce environmentally sound packaging

Our goal is to facilitate the identification and sorting of our discarded packaging in order to contribute to an increase in the recycling of household waste.

4. OPI is committed to reducing the variety of plastics employed and to use plastics of similar composition.
5. OPI has a policy of recycling waste material generated in the manufacturing process. Our strategy is to minimize all solid waste and to recycle or recover the energy whenever possible.

To carry out this commitment it is OPI's policy to:

Ensure our products, packaging, and operations are safe for our employees, consumers, and environment.

Reduce, or prevent the environmental impact of our products and packaging in their design, manufacture, distribution, and disposal whenever possible. We support the sustainable use of resources and actively encourage reuse, recycling, and energy extraction.

Meet or exceed the requirements of all environmental laws and regulations. We use environmentally sound practices, even in the absence of government standards. We cooperate with governments in analyzing environmental issues.

Continually assess our environmental technology and programs, and monitor progress toward environmental goals. We strive to develop product life cycle assessments, from raw materials to disposal, to assess environmental quality.

6. OPI is committed to ensure every employee understands and is responsible and accountable for incorporating environmental considerations in daily business activities.
7. OPI is committed to monitoring energy consumption, and where practical, adopts new technologies for improving energy efficiency.

OPI PRODUCTS INC.

8. OPI is committed to using raw materials of plant origin where feasible. The quality of our products is the most important consideration. We strive to replace raw materials of animal origin with materials derived from renewable plant origin.

9. As a step forward with the integration of sustainability principles in our assessment process of raw materials, we focus on three main priorities:

Preserve the health and safety of people

Preserve the health and safety of the environment

Protect biodiversity

Sustainability is evaluated in terms of the life cycle of a given raw material. This assessment includes:

Material origin

Manufacturing process

Primary materials used for its production

10. OPI places considerable importance on the quality and sustainability of relationships with our suppliers. We are collaborating with suppliers in an effort to share best practices, and develop an effective sustainable development policy throughout the entire supply chain.
